RE: 811 Directive

Dear Ms. Dotman,

This is to inform you that Aspire Telecom, Inc. as a switchless reseller, neither owns nor operates any facilities. We have no influence on or over the provision of abbreviated dialing codes such as the proposed "811" code.

As a non-facilities based carrier we will not be filing any tariffs nor will we be independently routing any "811" traffic. Such tariffs and traffic will all be routed and carried by the underlying Incumbent Local Exchange Carriers with whom we contract for customer's services.

Please feel free to contact us if you have any further questions or need any additional information.

Best regards,

R. Adam Kane
President
